91ucose transport protein 3, neuron-specific - rat
N;Alternate names: glucose transporter
C;Species: Rattus norvegicus (Norway rat)
C;Date: 07-Oct-1994 #sequence_revision 10-Nov-1995 #text_change C;Accession: $38981
R;Nagamatsu, S; Sawa, H.; Kamada, K.; Nakamichi, Y.; Yoshimoto, FEBS Lett. 334, 289-295, 1993
FEBS Lett. 334, 289-295, 1993
FEBS Lett. 334, 289-295, 1993
A;Title: Neuron-specific glu
A;Reference number: S38981;
A;Accession: S38981
A;Molecule type: mRNA
A;Residues: 1-493 <NAG>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           A;Gene: ERD6

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
608.

IT MAY ALSO PARTICIPATE WITH THE NA(+)/GLUCOSE COTRANSPORTER IN THE TRANSCELLULAR TRANSPORT OF GLUCOSE IN THE SMALL INTESTINE & KIDNEY.

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN.

TISSUE SPECIFICITY: PRESENT IN LIVER, INTESTINE, KIDNEY AND BETA-PANCREATIC ISLET CELLS.

SIMILARITY: HIGH TO OTHER GLUCOSE TRANSPORTERS.

SIMILARITY: BELONGS TO THE SUGAR TRANSPORTER FAMILY.
